William Blair SICAV Emerging Markets Debt Hard Currency Fund

OBJECTIVE

Risk-adjusted returns

CHARACTERISTICS

The Fund seeks to provide risk-adjusted returns through investments in hard-currency-denominated debt issued in emerging markets.

WHY CONSIDER THIS FUND?

- The historical yield advantage of emerging markets debt over developed markets debt provides the potential for attractive risk-adjusted returns.
- A combination of bottom-up and top-down expertise deepens our understanding of performance drivers, improving the decision making process.
- The breadth of the team allows for specialization and regional focus, enhancing our ability to identify opportunities and to avoid unattractive risks.
- The Fund is actively managed and is not constrained by a benchmark

RISKS

- The value of shares can increase or decrease and an investor may not get back the amount originally invested
- Where investments are made in currencies other than an investor's base currency, the value of those investments will be affected (favourably or unfavourably) by movements in exchange rates
- Investing in the bond market is subject to certain risks including market, interest rate, issuer, credit, and inflation risk. These risks may be enhanced in below investment grade securities
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries and investments in these countries are subject to greater risks

Past performance is not necessarily a guide to future performance. Returns for periods of one year or more are annualized. All charges and fees, except any entry, exit and switching charge, have been taken into account in calculating the Fund's performance. Returns for other share classes will differ from those shown above. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than the original cost. Levels and bases for taxation may change. For the most current month-end performance information, please visit our web site at sicav.williamblair.com.

- The JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified tracks the total return of U.S.-dollar denominated debt instruments issued by sovereign and quasi-sovereign entities. It is not possible to directly invest in an unmanaged index. Information has been obtained from sources believed to be reliable but JP Morgan does not warrant its completeness or accuracy. The index is used with permission. The index may not be copied, used, or distributed without JP Morgan's prior written approval. Copyright JPMorgan Chase & Co. All rights reserved.
- Active spread duration is the difference between the effective spread duration contribution from a particular security or market segment to a portfolio, and the contribution to the portfolio's benchmark. Effective spread duration is a measure of the sensitivity of a bond's price with respect to sovereign spread movement. It approximately measures the percentage change in a bond's price if spreads change by 100 bps.
- The credit quality of securities in the portfolio and Index are sourced from Standard & Poor's, Copyright © 2021, S&P Global Market Intelligence (and its affiliates, as applicable). Reproduction of any information, data or material, including ratings ("Content") in any form is prohibited except with the prior written permission of the relevant party. Such party, its affiliates and suppliers ("Content Providers") do not guarantee the accuracy, adequacy, completeness, timeliness or availability of any Content and are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such Content. In no event shall Content Providers be liable for any damages, costs, expenses, legal fees, or losses (including lost income or lost profit and opportunity costs) in connection with any use of the Content. A reference to a particular investment or security, a rating or any observation concerning an investment that is part of the Content is not a recommendation to buy, sell or hold such investment or security, does not address the suitability of an investment or security and should not be relied on as investment advice. Credit ratings are statements of opinions and are not statements of fact. Credit quality designations range from AAA (highest) to D (lowest). Credit quality ratings on underlying securities are received from S&P and Moody's which are converted to the equivalent S&P major rating category for presentation purposes only. The portfolio itself has not been rated.
- Duration distribution is the portfolio's allocation to different groups of bonds, where those groups are determined by the bonds' effective interest rate duration. Effective interest rate duration is a measure of the sensitivity of a bond's price with respect to a shift in U.S. interest rates. It approximately measures the percentage change in a bond's price if U.S. interest rates change by 100 bps.
 Option-adjusted spread (OAS) is a measure of the spread of a fixed income investment's yield relative to a benchmark, adjusted to take into account an embedded option.
 Information about the Fund's holdings should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector.
 Holdings are subject to change at any time. Top holdings are shown as a % of total net assets.
