Market Review

Global equities advanced in the third quarter, primarily driven by the U.S. significantly outperforming non-US developed and emerging markets — continuing the trend of U.S. equity strength. The U.S. bull market run became the longest in history, despite escalating concerns on geopolitical tensions and rising U.S. interest rates as Treasury bond yields surged higher in September.

U.S. equities extended year-to-date gains on robust strength in corporate earnings and positive signs of continued economic growth. Health Care and Information Technology drove outperformance. Mega-caps within IT, such as Amazon, Alphabet, and Apple, extended to record highs on consensus-beating quarterly results. This market cap leadership was representative of the broader U.S. market performance, as large caps outperformed their small cap counterparts by approximately 3%, as measured by the MSCI U.S. Standard and Small Cap indices.

Non-U.S. developed market equity performance was mixed in the third quarter with positive performance in Japan and weaker returns in the U.K. Japanese equities rallied on the re-election of Shinzo Abe to the leadership position of the ruling Liberal Democratic Party; a positive signal to investors that Abenomics policies would continue. The re-election coupled with a weakening yen bolstered investor sentiment in September, bringing Japanese equities into positive territory year-to-date. For the U.K., the pound slumped to an 11-month low versus the U.S. dollar on Brexit uncertainty and growing fears about the potential collapse in talks. U.K. equities recovered in September, but remained down (-2.0% MSCI U.K. IMI) for the quarter. Emerging markets equities continued to decline in the third quarter and year-to-date amid heightened geopolitical tension and a strengthening U.S. dollar. The Turkish Lira plunged to record lows following the U.S.-imposed sanctions on Turkey for failure to release evangelical pastor Brunson. Russian and South Africa currencies sold-off in solidarity with the Turkish Lira. Trade war rhetoric remained a headwind for China, compounded

by concerns about decelerating macro indicators and the weakening renminbi currency, which further weighed on sentiment and Chinese equities broadly.

From a style perspective, value-oriented market leadership accelerated in September within non-U.S. developed and emerging markets. The broad sell-off of growth oriented stocks across emerging markets was most pronounced within China and India, as measured by the MSCI China IMI Growth and the MSCI India IMI Growth indices.

Performance

Underperformance versus the MSCI Emerging Markets IMI (net) was primarily driven by negative stock selection across the Information Technology, Financials, Energy and Materials sectors. Within Information Technology, the overweighting to Internet Software and Services coupled with stock selection within the Electronic Equipment, Instrument and Components industry hurt relative performance. In particular, Yageo Corp, the Taiwanese passive components manufacturer, weighed on relative returns. Following a strong rally in the first half of the year, the stock corrected on a combination of weakening operating momentum, high expectations and broad sector rotation. We sold the stock as a result. Financials performance was dragged down by the Indian Financials overweighting, as the sector declined on liquidity concerns regarding non-banking financial companies and the financial system broadly. Within the resources-oriented sectors, the most notable detractors to relative performance were the Energy underweighting coupled with Materials stock selection (dragged down by our chemicals selection). Partially offsetting these negative effects were the Materials and Communication Services underweight allocations. Real Estate also added to relative performance, aided by the underweighting and positive stock selection. The latter was boosted by strong results by Vincom Retail, Vietnam's largest retail real estate developer. Furthermore, Wal-Mart de Mexico, the Mexican retailer, was a notable contributor within Consumer Staples sector. The stock benefited from improving consumer sentiment in Mexico and currency tailwinds.

From a regional perspective, Emerging Asia was a key detractor to relative performance, hampered by China and Korea stock selection coupled with the India overweight. In particular, IT and Health Care selection weighed on China results while China-related holdings hampered relative performance in Korea. These negative effects were somewhat mitigated by positive contribution from Mexico and Turkey.

Positioning

During the period, Financials exposure was increased through the purchases of Bank Central Asia and First Abu Dhabi Bank. Bank Central Asia is the Indonesian high quality bank with a large deposit franchise and is well positioned to benefit from the rising interest rate environment in our view. First Abu Dhabi Bank is the leading bank in UAE. We believe the solid growth outlook for the bank is underpinned by its leading market share position, better-than-expected merger synergies and an improving macroeconomic backdrop. Consumer Discretionary exposure was reduced to an underweight position during the period through trims and outright liquidations. Chinese education holdings New Oriental Education and Tal Education were sold amid increased regulatory headwinds. Hotel Shilla, the Koran duty free store operator, was sold on the back of increased competition and concerns regarding Chinese tourists demand. Exposure to Health Care also declined as a result of the sale of Chongqing Zhifei Biological, the Chinese vaccines manufacturer, and reductions to Chinese pharmaceutical companies CSPC and Sino Biopharmaceutical. From a geographic perspective, notable adjustment was increases to India, offset by a decrease to China.

Outlook

As we head into the final quarter of 2018, surveys suggest that global growth is likely to decelerate modestly into the remainder of this year. Specifically, purchasing manager surveys continue to point to deceleration in the pace of industrial orders growth and

subsequent industrial production growth. Given substantial and relatively abrupt changes in US trade policy, we now expect near term economic activity to slow somewhat as firms work out the new rules and adjust to the impact on their supply chains.

At the same time, we expect the growing divergence between the US and other economies to begin to normalise. Specifically, in Q2 2018 the US economy expanded at an annual rate of 4.2% - the rate of growth which we believe is likely to mark the cyclical high. Consistent with this high economy-wide growth rate, corporate earnings growth accelerated to 22% YoY, a decade high (excluding the post global financial crisis bounce). Barring additional policy support, it is difficult to see US corporates maintaining this rate of profit growth. If the rest of the world continues to grow at the current pace, while the US economy slows marginally, the growth wedge and by extension the substantial outperformance of US markets vis-à-vis the rest of the world is likely to moderate from here.

Rising US yields and increasing fiscal deficits in emerging markets (EMs) have reduced US dollar liquidity in 2018. More recently, higher oil prices in the wake of the US re-imposing economic sanctions on Iran contribute to a more challenging macroeconomic environment for the EMs, as many are large energy importers. Beyond these broader macro headwinds, turbulence within EM equities and currencies has been largely idiosyncratic and self-inflicted: the South African government reopening the possibility of farm repossession, for example, and the upcoming presidential election in Brazil where the top two contenders are from the far-right and the far-left. Increasingly reckless economic policies in Turkey and the exposed fragility of the Indian financial system have also compounded EM underperformance versus developed markets.

On September 24th, the Trump administration implemented 10% tariffs on \$200 billion worth of imported goods from China, which will increase to a rate of 25% on January 1st, 2019. This is in addition to the \$50 billion of tariffs that were implemented in July and August. While the first set of tariffs was initially focused

on industrial goods such as materials, machinery, and chemicals, the second round of tariffs is targeting over 5,700 consumer goods, including agricultural products, textiles, and furniture.

With the implementation of the second round of tariffs including consumer goods, we are expecting inflation from the additional tariffs to pick up in the near term. Corporations that are affected by the additional tariffs will either have to absorb the costs themselves, leading to a decrease in margins, or will pass along the additional costs to the end consumer to keep their profits intact. As cost increases are pushed to the consumer, we are expecting to see an uptick in inflation starting in 2019.

Through much of this year, China has been implementing significant and wide-spread changes in its tax structure, affecting both corporate and income taxes. Reducing taxes for households is expected to support consumer demand in China. We are not expecting China to implement a large stimulus, but slow policy changes have been made to keep growth steady. Year to date, the renminbi is down nearly 6% against the US dollar. As the dollar strengthens, further depreciation cannot be ruled out.

From a portfolio strategy perspective, positioning within our ACWI-oriented strategies has generally reflected our more cautious outlook, with reduced EM weightings in favour of increased developed market exposure. Within our dedicated EM strategies, we have maintained overweight positions in India and Mexico, and underweight exposures in Korea and Taiwan. Within China, our positioning continues to emphasise domestically-oriented consumer, healthcare and technology companies that, we believe, are well positioned to benefit from the economy's ongoing transition to a consumption and services-driven growth model.

Important Disclosures

Important Disclosures

The Fund, the Management Company and the Investment Manager

This document has been prepared and issued by FUNDROCK MANAGEMENT COMPANY S.A., a "société anonyme", incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 33, rue de Gasperich, L-5826 Hesperange and registered in the R.C.S. Luxembourg under n° 104196 (the "Management Company"). The Management Company is authorised and regulated by the Luxembourg Supervisory Authority of the Financial Sector (the "CSSF") as the management company of UCITS (defined below) under the EU directive 2009/65/EC, as amended.

The Management Company has been appointed as the management company of WILLIAM BLAIR SICAV, a "société d'investissement à capital variable", incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 31, Z.A.I. Bourmicht, Bertrange, registered in the R.C.S. Luxembourg under n° 98806 and approved by the CSSF as an undertaking for collective investment in transferable securities (UCITS) in accordance with the EU directive 2009/65/EC, as amended (the "Fund").

The Management Company has appointed WILLIAM BLAIR INVESTMENT MANAGEMENT, LLC, the asset management business of WILLIAM BLAIR & COMPANY, LLC., having its registered office at 222 West Adams Street Chicago, IL 60606, USA ("William Blair Group") as the investment manager for the Fund (the "Investment Manager").

Fund Distribution

The Fund is currently registered for public offering only in the following countries: Austria, Denmark, Finland, France, Germany, Ireland, Luxembourg, Norway, Sweden, Switzerland and the UK. Therefore the Fund may not be registered to be marketed in your jurisdiction or may only be marketed to certain categories of investors in your jurisdiction.

Marketing Materials

William Blair Group makes no representations that these marketing materials are appropriate or available for use in any jurisdiction. This document is not intended to be published or made available to any person in any jurisdiction where doing so would result in contravention of any laws or regulations applicable to the recipient. This document shall constitute a marketing communication only in the countries in which the Fund has been registered for public offering. In any other countries, laws and regulations may restrict the access to the present website. The access to the present website is not to be considered as marketing communication or as the marketing of the shares of the Fund if such access to such information and documentation through a website would be unlawful.

Fund Documents

The Articles of Incorporation, the Prospectus, the Key Investor Information Documents (KIID), the Annual and Half-yearly Reports of the Fund and the Subscription Form are available free of charge in English and German from our website sicav.williamblair.com or at the registered office of the Management Company (33, rue de Gasperich, L-5826 Hesperange, Grand Duchy of Luxembourg), at the registered office of the Fund (William Blair SICAV, 31, Z.A. Bourmicht, L-8070 Bertrange, Grand Duchy of Luxembourg) or from the Swiss representative, First Independent Fund Services Limited, Klausstrasse 33, CH-8008 Zurich, and in German language at Marcard, Stein & Co., Ballindamm 36, 20095 Hamburg, Germany, and at Bank of Austria Creditanstalt AG, Am Hof 2, 1010 Vienna, Austria.

Recipients of this Document

The present document is not intended to be directed to those categories of investors to which the communication of this document would be unlawful in any country according to any applicable law or regulation. This document is intended for the use of the persons to whom it is addressed, being persons who are Professional

Important Disclosures

Investors as defined in the Markets in Financial Instruments Directive (2004/39/EC), understood as financial advisers, insurance companies, asset managers, discretionary wealth managers, banks and other authorised intermediaries. Therefore, its content should not be used by retail clients. These materials are not intended to be distributed or passed on, directly or indirectly, to any other class of persons and may not be relied upon by such persons and is therefore not intended for private individuals or those who would be classified as retail clients. William Blair Group does not accept responsibility for retail clients accessing information intended exclusively for Professional Investors.

No Investment Advice

This document has been produced for information purposes only and is not to be construed as investment advice or a solicitation or an offer to purchase or sell investments or related financial instruments to any recipients. The investments in the Fund may not be suitable for all recipients. This document does not contain personalized recommendations or advice and is not intended to substitute any professional advice on investment in financial products. Recipients of this document should make their own investment decisions based upon the Fund Documents listed above (which can be obtained free of charge) and in accordance with their own financial objectives and financial resources and, if in any doubt, should seek advice from independent professional advice as to risks and consequences of any investment

Risks - Recipients of this document should be aware of the risks detailed in this paragraph.

Please be advised that any return estimates or indications of past performance on this document are for information purposes only. Past performance is not necessarily a guide to future performance and no assurance can be made that the profits will be achieved or that substantial losses will not be incurred. The value of shares and any income from them can increase or decrease. An investor may not get back the amount originally invested. Where investment is made in currencies other than the investor's base currency, the value of those investments, and any income from them, will be affected by movements in exchange rates. This effect could be unfavourable as well as favourable. Levels and bases for taxation may change. Further specific risks may arise in relation to specific investments and you should review the risk factors very carefully before investing. Intended risk profile of the Fund may change overtime. The Fund is designed for long-term investors. For the most current month-end performance information, please visit our web site at sicav.williamblair.com.
