Market Review

Global equities posted strong results for the first half of 2019 despite signals of decelerating global growth and mounting uncertainty surrounding trade relations between the U.S. and China. Gains across most markets were primarily driven by the more accommodative tone out of major central banks. From a geopolitical perspective, the prospect of a trade deal between the U.S. and China which fueled equity markets to start the year quickly soured in the month of May following news that the U.S. would increase tariffs from 10% to 25% on nearly half the goods purchased from China (roughly \$200 billion US dollars). Despite the unexpected volatility in May, equities rebounded in June to close out a strong first six months of the year with the MSCI ACWI Investable Market Index (IMI) up 16.07% year-to-date.

U.S. equities rallied in the first half of 2019 (+18.42%) after the large selloff in 4Q18. Growth in the U.S. remained solid but started to decelerate off of last year's previous highs. The Federal Reserve's acknowledgment of slower economic growth and dovish stance on interest rates helped ease investor sentiment and boosted returns across sectors, especially cyclically-oriented sectors such as Information Technology, Industrials and Consumer Discretionary.

European equities also advanced despite signs of significant deceleration in manufacturing growth. Specifically, purchasing manager surveys continued to point to deceleration in the pace of industrial orders growth and subsequent industrial production growth in the Euro Area. This was especially evident in Germany where manufacturing growth has been shrinking and business sentiment has weakened over the past year. As European sovereign 10-year bonds yields hit record lows in June, the European Central Bank announced that further monetary stimulus to boost inflation was ready if needed. The MSCI Europe ex U.K. IMI advanced 5.64% for the quarter and 16.74% year-to-date in U.S. dollar terms.

Ambiguity surrounding Brexit continued to weigh on the economic conditions within the U.K. Equities felt some relief to start the year after the U.K. was granted an extension from the European Union to delay the Brexit process past the March 29 deadline. But political woes returned following the failed final bid to get a deal through parliament and the subsequent resignation of Prime Minister Theresa May. While the Conservative Party began the process of selecting its new leader, who will also become Prime Minister, political uncertainty drove Sterling weakness amid increased expectations of a disorderly Brexit on October 30. The MSCI U.K. IMI advanced modestly for the quarter (+0.74%), but was up 13.16% year-to-date in US dollar terms.

Equity performance across Emerging Market countries was mixed year-to-date. China equities declined 4.11% in the second quarter amid the trade war re-escalation and lower expectations regarding the level of government stimulus measures. Despite this correction, Chinese shares (including Hong Kong and New York-listed companies) were up 12.73% for the six-month period, while China's mainland-listed securities (A-shares) advanced 28.28%. Higher crude prices contributed to strong equity market gains across oil exporting countries such as Russia (+30.70%) and Brazil (+16.39%), but negatively impacted oil importing countries such as India (+6.43%) and Indonesia (+6.88%) year-to-date.

Performance

Second quarter outperformance versus the MSCI Emerging Markets Small Cap (net) was primarily driven by positive stock selection across most sectors. The Health Care, Consumer Discretionary and Information Technology sectors were the most notable contributors to relative return. Within Health Care, Notre Dame Intermedica, the Brazilian healthcare plan operator, helped relative performance as the company delivered strong results driven by strong top line growth and an improved medical loss ratio. Moreover, the growth outlook remains

supportive as the company is set to continue to benefit from the recent Greenline acquisition. Li Ning, a Chinese sportswear company within Consumer Discretionary was an additional source of outperformance. The stock price was propelled by Li Ning's continued strong same-store-sales growth, accelerating ecommerce sales, and improved margins on the back of its better brand image and increased premium segment sales. Within the Information Technology sector, Globant, the Argentine IT services company, contributed to relative returns amid solid results driven by a robust demand backdrop for the emerging technologies that the company specializes in, and continued margin expansion. We believe the company's unique business model and strong execution will continue to drive robust operating performance.

Partially offsetting these effects was negative stock selection within the Utilities and Real Estate sectors. Within Utilities, Mahanagar Gas of India hurt relative results, as weaker fundamental performance, including lower margins, hampered investor sentiment. However, we believe a solid demand outlook and recent price hike should boost operating results in the next few quarters. Yuzhou Properties, a leading residential property developer within the Real Estate sector, detracted from relative performance due to weakening sales growth momentum and deteriorating investor sentiment amid government policy tightening concerns. We exited the position as a result.

Positioning

During the second quarter, Consumer Staples exposure was reduced through the liquidations of By-health and Indofood. By-health is engaged in the production and sale of dietary supplements in China. We believe tighter medical insurance policies and slower ecommerce sales growth will continue to weigh on near-term results; we sold the stock as a result. Indofood, a leading food and beverage manufacturer in Indonesia, was also sold due to weaker fundamental

performance. Health Care exposure was reduced during the period, as Torrent Pharmaceuticals of India was sold amid ongoing concerns related to the US Food and Drug Administration's observations post-inspection of the company's Indrad facility in Gujarat. Wuxi Biologics Cayman of China was also liquidated due to market cap considerations while Zhangzhou Pientzhuang Pharmaceutical, the Chinese traditional medicine company, was sold due to disappointing earnings growth, as higher raw materials costs weighed on margins.

These reductions were offset primarily by increases to Financials and Information Technology. Within Financials, Tisco Financial Group and Bank Tabungan Pensiunan Nasional were bought during the period. Tisco Financial is a bank holding company that provides consumer finance, asset management, brokerage and investment banking service in Thailand. We believe the company's management team stands out for its consistent track record of strong profitability and shareholder focus. Bank Tabungan Pensiunan Nasional, is the most profitable listed bank in Indonesia with a unique position in the ultra-micro segment. The bank's solid growth outlook is underpinned by strong loan growth amid increased micro lending penetration and large market opportunity with strong barriers to entry, coupled with improved profitability. Within the Information Technology sector, Network International Holdings was a notable new purchase during the period. Network International Holdings, based in the UAE, is the largest pan-regional provider of digital payment solutions in the Middle East and Africa and a recent IPO. The company has a leading position in the region, with above-industry margins and high free cash flow generation. We believe Network International Holdings is well positioned to benefit from the secular growth trend of cash to digital payments and an attractive macroeconomic backdrop. From a geographic perspective, notable adjustments during the quarter were increases to India, offset by decreases to China.

Outlook

The global growth environment appears to be stabilizing after a period of deceleration in economic activity over the past year. Among the higher frequency data that we monitor, we have been encouraged by recent stabilization in the orders minus inventories component of manufacturing PMIs in the U.S., Euro Area, UK and Japan, signaling a rebound in industrial production volumes.

Looking forward to the second half of the year, we see geopolitical risks to economic activity abating: U.S.-China trade talks are back on, European Parliamentary elections are behind us, and the recently announced key European appointments (European Central Bank and European Commission presidents) suggest a better policy mix going forward.

The recent moderation in U.S.-China tariff threats is particularly important, as the escalation in hostilities and uncertainty about a potential trade deal weighed on industrial activity and order flows in the first half of 2019. At the same time, we saw signs of a bottoming in activity even before the announced truce in Osaka—notably that sales of semiconductors had troughed. This is an increasingly valuable indicator of near-term economic momentum. While the industry has consolidated and matured, semiconductors are used increasingly widely in almost all areas of industrial manufacturing and production.

Bond market investors are suggesting a different verdict on the global economy, however. The dichotomy of views expressed by equities and fixed income investors is best encapsulated by the decoupling of economic growth (equities) and inflation (bonds). Specifically, U.S. inflation continues to edge lower (1.6% YoY), even as the US economy enters its 10th year of expansion. The situation is broadly repeated across many developed economies. It is little surprise then that the U.S. Federal Reserve feels compelled to lower rates.

From a corporate earnings perspective, net income growth appears to be bottoming in the Euro Area, the U.K., Japan and China after an 18 month period of steady deceleration. U.S. earnings growth has recently stabilized at 19% after weakening from 27% in December 2018, although consensus growth estimates for the next 12 months are significantly lower at 6%. This discrepancy in actual versus future growth expectations starkly contrasts with non-U.S. markets, where forward expectations are more in line with current growth rates, reflecting the shrinking economic growth wedge that has favored the U.S.

Equity valuations have stabilized and are broadly similar across different geographic regions following the sizable de-rating that occurred during the fourth quarter 2018 market selloff. Price/Earnings multiples in the U.S. and Euro Area are roughly in line with their respective ten year averages, while China is trading modestly below its ten year average multiple.

Although positioning changes by sector and geography varied across our strategies during the first half of the year, there were some broadly consistent themes reflecting the market environment and company fundamentals. From a sector perspective, IT and Industrials weightings were generally higher due to our active repositioning into relatively attractive areas like software, payments and machinery. From a country perspective, exposures to China and India were incrementally increased across most strategies, while Japan weightings were reduced in our global/non-U.S. strategies.

Research Insights – 5G

We thought it would be interesting to expand upon our standard market outlook commentary by highlighting current topics of interest from our team, where we are assessing corporate performance in the context of broader growth themes and economic value shifts across different industries. To that effort, our technology analysts recently presented their initial findings from a formal research project exploring the investment

implications of the rollout of fifth generation cellular network technology (5G) — which we believe represents an exciting secular growth opportunity.

Much of the promise around 5G stems from its 10x performance advantage over fourth generation technology on data speeds and latency, which will help unlock the potential of many innovative consumer and business-centric applications, including the Internet of Things (IoT). The emergence of 5G will significantly impact how these services are delivered over time. Among the potential advantages are high data rates, reduced latency, cost reductions, energy savings, and higher system capacity.

“The initial use cases for 5G are making existing applications work better or cheaper,” notes analyst Bill Benton, as video streaming and home assistant applications (cloud-based artificial intelligence) are among the early beneficiaries. Fixed wireless broadband, which enables internet access through radio waves rather than cable lines, has the largest total addressable market among the initial 5G use cases.

Intermediate term consumer-centric applications enabled by 5G include cloud gaming, augmented reality and virtual reality. More intriguing to us are the longer-term business-focused applications — encompassing automotive-related, cloud robotics and smart factories (Industrial IoT). Demand from local governments is also likely to be significant, driven by the ongoing adoption of smart cities technologies, including traffic and energy management, and infrastructure to vehicle communications.

Investment risks inherent in these economic value shifts are important to consider. Potential losers from the 5G rollout include incumbent telecom equipment suppliers who are vulnerable to a shift away from proprietary toward open network architecture that could weaken pricing power and market share. This would more than offset any near-term benefit from initial infrastructure deployments. Intellectual Property landlords such as Qualcomm are also at risk, facing potential loss

of market share and influence as future network technology development becomes less U.S.-dominated.

The broader investment risks to 5G include a slower ramp both in deployment (capital expenditure) and adoption (customer unwillingness to pay), in addition to intensifying regulatory pressures impacting carrier pricing power. The sourcing of telecom equipment and supply chain balkanization are also important risks to consider, as evidenced by U.S.-China trade hostilities and concerns about Huawei’s ties to the Chinese government.

Our work on 5G is ongoing and dynamic in nature. We continue to monitor developments and reassess investment implications for companies globally, coordinating our research efforts to provide a holistic view across different industries and market cap segments. We look forward to sharing more of our evolving perspectives on 5G and other areas of research focus in future client communications.

Index: MSCI Emerging Markets Small Cap (net)

Past performance does not guarantee future results. Performance cited represents past performance and current performance may be lower or higher than the data quoted. Gross investment performance assumes reinvestment of dividends and capital gains, is gross of investment management fees and net of transaction costs. Performance results will be reduced by the fees incurred in the management of the account. For example, assuming an annual gross return of 8% and an annual management/advisory fee of .40%, the net annualized total return of the portfolio would be 7.58% over a 5-year period. Net investment performance represents the deduction of the account's actual fee. Investment management fees are described in William Blair's Form ADV Part 2A. Attribution is based on estimated returns of all equities held during a measurement period, including purchases and sales. Calculations are for attribution analysis only and are not intended to represent simulated performance history. The actual returns may be higher or lower. We calculate attribution using Opturo. Opturo runs transactions-based attribution, taking into account all trading activity. Sectors are based on Global Industry Classification (GICS) Sectors. International investing involves special risk considerations, including currency fluctuations, lower liquidity, economic and political risk. WB Valuation Model (Percentile)	79	49	
P/E (next 12 months)	19.2	11.8	62%
Dividend Yield (%)	1.7	2.7	-37%
Other			
WB Composite Model (Percentile)	52	51	
Float Adjusted Weighted Average Market Cap (\$m)	1,787	731	144%
Number of Holdings	136	1,644	
Active Share (%)	92	--	

The index is comparable to the strategy in terms of investment approach but contains significantly more securities. Calculated in FactSet, with the exception of market cap and active share, which are calculated in Eagle.

*This measure represents the weighted average of forecasted growth in earnings expected to be experienced by stocks within the portfolio over the next 3-5 years. This projected earnings growth should not be considered an indication of future performance. From a portfolio perspective, the portfolio P/E ratio and EPS Growth Rate are weighted averages of the individual holdings' P/E ratios and EPS Growth Rates.

Important Disclosures

The Fund, the Management Company and the Investment Manager

This document has been prepared and issued by FUNDROCK MANAGEMENT COMPANY S.A., a "société anonyme", incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 33, rue de Gasperich, L-5826 Hesperange and registered in the R.C.S. Luxembourg under n° 104196 (the "Management Company"). The Management Company is authorised and regulated by the Luxembourg Supervisory Authority of the Financial Sector (the "CSSF") as the management company of UCITS (defined below) under the EU directive 2009/65/EC, as amended.

The Management Company has been appointed as the management company of WILLIAM BLAIR SICAV, a "société d'investissement à capital variable", incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 31, Z.A.I. Bourmicht, Bertrange, registered in the R.C.S. Luxembourg under n° 98806 and approved by the CSSF as an undertaking for collective investment in transferable securities (UCITS) in accordance with the EU directive 2009/65/EC, as amended (the "Fund").

The Management Company has appointed WILLIAM BLAIR INVESTMENT MANAGEMENT, LLC, the asset management business of WILLIAM BLAIR & COMPANY, LLC., having its registered office at The William Blair Building | 150 North Riverside Plaza, Chicago, Illinois 60606, US ("William Blair Group") as the investment manager for the Fund (the "Investment Manager").

Fund Distribution

The Fund is currently registered for public offering only in the following countries: Austria, Denmark, Finland, France, Germany, Ireland, Luxembourg, Norway, Sweden, Switzerland and the UK. Therefore the Fund may not be registered to be marketed in your jurisdiction or may only be marketed to certain categories of investors in your jurisdiction.

Marketing Materials

William Blair Group makes no representations that these marketing materials are appropriate or available for use in any jurisdiction. This document is not intended to be published or made available to any person in any jurisdiction where doing so would result in contravention of any laws or regulations applicable to the recipient. This document shall constitute a marketing communication only in the countries in which the Fund has been registered for public offering. In any other countries, laws and regulations may restrict the access to the present website. The access to the present website is not to be considered as marketing communication or as the marketing of the shares of the Fund if such access to such information and documentation through a website would be unlawful.

Fund Documents

The Articles of Incorporation, the Prospectus, the Key Investor Information Documents (KIID), the Annual and Half-yearly Reports of the Fund and the Subscription Form are available free of charge in English and German from our website sicav.williamblair.com or at the registered office of the Management Company (33, rue de Gasperich, L-5826 Hesperange, Grand Duchy of Luxembourg), at the registered office of the Fund (William Blair SICAV, 31, Z.A. Bourmicht, L-8070 Bertrange, Grand Duchy of Luxembourg) or from the Swiss representative, First Independent Fund Services Limited, Klausstrasse 33, CH-8008 Zurich, and in German language at Marcard, Stein & Co., Ballindamm 36, 20095 Hamburg, Germany, and at Bank of Austria Creditanstalt AG, Am Hof 2, 1010 Vienna, Austria.

Recipients of this Document

The present document is not intended to be directed to those categories of investors to which the communication of this document would be unlawful in any country according to any applicable law or regulation. This document is intended for the use of the persons to whom it is addressed, being persons who are Professional Investors as defined in the Markets in Financial Instruments Directive (2004/39/EC), understood as financial advisers, insurance companies, asset managers,

Important Disclosures

discretionary wealth managers, banks and other authorized intermediaries. Therefore, its content should not be used by retail clients. These materials are not intended to be distributed or passed on, directly or indirectly, to any other class of persons and may not be relied upon by such persons and is therefore not intended for private individuals or those who would be classified as retail clients. William Blair Group does not accept responsibility for retail clients accessing information intended exclusively for Professional Investors.

No Investment Advice

This document has been produced for information purposes only and is not to be construed as investment advice or a solicitation or an offer to purchase or sell investments or related financial instruments to any recipients. The investments in the Fund may not be suitable for all recipients. This document does not contain personalized recommendations or advice and is not intended to substitute any professional advice on investment in financial products. Recipients of this document should make their own investment decisions based upon the Fund Documents listed above (which can be obtained free of charge) and in accordance with their own financial objectives and financial resources and, if in any doubt, should seek advice from independent professional advice as to risks and consequences of any investment

Risks - Recipients of this document should be aware of the risks detailed in this paragraph.

Please be advised that any return estimates or indications of past performance on this document are for information purposes only. Past performance is not necessarily a guide to future performance and no assurance can be made that the profits will be achieved or that substantial losses will not be incurred. The value of shares and any income from them can increase or decrease. An investor may not get back the amount originally invested. Where investment is made in currencies other than the investor's base currency, the value of those investments, and any income from them, will be affected by movements in exchange rates. This effect could be unfavourable as well as favourable. Levels and bases for taxation may change. Further specific risks may arise in relation to specific investments and you should review the risk factors very carefully before investing. Intended risk profile of the Fund may change overtime. The Fund is designed for long-term investors. For the most current month-end performance information, please visit our web site at sicav.williamblair.com
