Market Review

After a strong performance in 2021, global equities declined (-5.47%) in the first quarter (as measured by the MSCI ACWI IMI) amid increased market volatility induced by concerns over inflation, rising interest rates, and heightened geopolitical tension in Eastern Europe. In January, concerns over rising inflation and hawkish moves by the Federal Reserve drove a sharp style rotation into lower-value, lower-growth-oriented securities. Volatility continued in February as the Russian invasion of Ukraine prompted a coordinated response by Western countries in the form of firm sanctions targeted at Russia's financial system. The sanctions on Russia rendered Russian equities and the ruble un-investable with fears of contagion to other markets. In this environment, growth equities significantly underperformed value-oriented equities (the MSCI ACWI IMI Growth declined -9.83% while the MSCI ACWI IMI Value declined -1.08%). This was evident from a global sector perspective as consumer discretionary (-11.63%) and information technology (-10.37%) declined while energy stocks strengthened (+22.64%) on stronger crude oil prices.

Developed markets declined (-5.32%) as measured by the MSCI World IMI. U.S. equities declined (-5.38%) as the Russian invasion of Ukraine amplified existing concerns over rising inflation and interest rates. The Federal Reserve approved its first interest rate increase (0.25%) in over three years with further hikes expected throughout the rest of the year. Europe ex-U.K. plunged (-10.04%) as heightened concerns over the availability of Russian energy imports to Europe weighed on investor sentiment. In addition to targeting Russia's key financial institutions, the U.S. and European allies also cut Russia from the SWIFT International Payment system. Germany also announced it would be halting the certification of the Nord Stream 2 gas pipeline from Russia.

Emerging markets declined (-6.65%) with mixed returns across countries. Russian equities plunged as the broad range of

sanctions imposed on their economy weighed heavily on the ruble and market returns. China sharply declined primarily in March (-14.27% for the quarter) amid a spike in COVID-19 cases and newly imposed lockdowns across major cities. Conversely, Latin America generated strong returns for the quarter (+26.34%) with broad outperformance across countries. Oil exporters and commodity beneficiaries such as South Africa (+19.30%), Kuwait (+18.56%), and Saudi Arabia (+16.64%), also outperformed.

Performance

First quarter underperformance versus MSCI ACWI IMI (net) was primarily due to a significant rotation in the market toward low-valuation, low-quality, and low-growth companies. From an attribution perspective, weaker stock selection within industrials and information technology significantly weighed on performance.

Weaker industrials stock selection was primarily driven by Rational. Rational is the leading manufacturer of innovative cooking equipment and cooking intelligence (software) for professional kitchens. Our long-term thesis remains underpinned by the company's strong competitive advantages and growth supported by the structural shift toward health-conscious cooking, labor shortages, and cultural shifts in emerging markets toward eating away from home. The share price declined in the first quarter amid weaker-than-expected full-year numbers amid supply-chain issues primarily for electronic parts.

Within information technology, Infineon Technologies, a leading semiconductor company based in Germany, hampered relative performance. Infineon is a leader in structural opportunities in automotive and power markets. We believe this should continue to enable superior growth driven by content gains and supportive regulation. Despite solid quarterly earnings, Infineon's share price softened alongside semiconductor peers as a part of the broad style rotation early in the quarter.

Management also reiterated that supply constraints continue to limit overall growth, but shortages have started to ease.

These effects more than offset positive stock selection within communication services, primarily driven by Alphabet. Our thesis for Alphabet is premised on the stability and sustained leadership (85%+ global share) of core Google Search, where attractive underlying profitability enables continued investment in the existing ecosystem and earlier-stage adjacencies. On a five-year view, we expect 15% revenue growth (led by YouTube and Google Cloud), with upside optionality from under-monetized assets like Google Maps. Operating margins will likely be relatively flat over the next 2-3 years given continued investment in public cloud and other tangential TAMs, but we have seen evidence of more disciplined cost control with moderating headcount growth and faster decision-making around noncore investments. With stability in the core business and opportunities for profit enhancement in adjacencies intact, we believe valuation is attractive and fundamental durability is as strong as ever.

Positioning

During the quarter, industrials and information technology exposure decreased primarily through market depreciation. Real estate exposure also decreased through a reduction to Prologis. Financials exposure increased primarily through market appreciation, especially through B3 and AIA. Emerging markets exposure totaled 8.6% of the portfolio, up from 7.7% at the beginning of the year.

Outlook

As we begin the second quarter of 2022, we reflect on the unique environment we have experienced the last two years. The nature of the economic cycle, originally due to the COVID pandemic, has been exacerbated. We've experienced an extreme closing and reopening of the global economy, accompanied by unprecedented liquidity, and pronounced rotations in style –

first with growth outperforming strongly, and more recently value charging back. Finally, the Russian invasion of Ukraine continues to impact the economy and the markets and in response we have needed to reassess our outlook leading into this year.

Similar to our forecast earlier this year, we continue to see a natural slowing of economic growth from very high levels seen in 2020; but also, rising inflation, which implies a further deceleration of earnings growth. We also continue to analyze the rising interest rate environment and its relationship to valuations.

Growth – Post-Russian Invasion

In terms of growth, we continue to see risks of slower economic and corporate profit growth than we had originally expected. Importantly, in contrast to our prior outlook, we now expect materially lower growth in Europe. Leading into the year, most European economies remained much below their pre-pandemic output trajectory and now the Russian invasion of Ukraine has created further downward pressure. Particularly in Eastern and Central Europe, expanding past Russia, into Hungary and Poland, we'll expect continued acceleration in inflation, currencies under pressure and higher interest rates.

Within the U.S., we see less impact and expect growth to remain at broadly similar levels as in our pre-Russian invasion case, which is a significant sequential deceleration in economic activity, from approximately 5.5% growth that we observed in 2021 down to closer to 2.5% growth rate by the end of the year. Corporate profit growth expectations seem reasonable and remain at the highest level for most major countries.

Within China, our outlook is mixed. We've seen a resurgence of COVID and lockdowns, which we expect to impact economic activity and weakening of growth in the first half of this year, coupled with potential geopolitical risk. In contrast, we think the government's focus on a stable economic environment will lead to a moderate fiscal and monetary stimulus as well as potential

for some easing of regulatory pressures. Valuations in China are also relatively attractive in our view, after a difficult 2021.

Inflation

The ongoing lockdowns and the military conflict that we now have in Europe has prompted us to revise our inflation projections further. We originally expected inflation to peak in early summer. We now expect inflation to peak at a higher rate in the later part of this year and to rollover thereafter. Of course, wage pressures were something that we were going to monitor on an ongoing basis, and that that remains a key variable to watch in the U.S. What that means for equity markets, is that corporate earnings growth, especially outside the U.S., is expected to decelerate further throughout much of 2022, which will put further downward pressure on multiples.

Valuation and Style Performance

Thus far in 2022, we've seen one of the most significant style rotations we have experienced in multiple decades.

Which leads us to a discussion regarding equity valuations. The general relationship between rates and valuations holds, and despite the influences of the conflict and persistent inflation, we do believe that we are still in a long-term economic recovery. Thus, we expect gradual monetary tightening and removal of excess liquidity. Consequently, leading to further multiple contraction as the expansion continues and rates go higher.

This has direct implications for the performance of Growth equities vs Value equities, and we have seen this play out

significantly in the beginning of 2022. Valuation as a factor has been by far the strongest driver of performance year to date.

Does this imply that the very long run of quality growth over value is over? We don't think so. Many of the drivers of the outperformance of Growth are still in place: positive but lower economic growth, low (albeit rising) interest rates, and a competitive landscape in the real economy that acknowledges the structural advantages of some areas of the economy over others, as well as those of differentiated, innovative business models. As it relates to interest rates, as measured by the 10-year yield, we believe would need to meaningfully rise from current levels (+300bps), to significantly affect relative future profitability and future investment premium.

And as we look forward, what hasn't changed? We think the innovation and disruption cycle hasn't changed, and arguably, has even accelerated. The dynamic shifting of corporate winners and losers remains a constant, and again, if anything, may be accelerated. Importantly, durability or improvements in corporate competitive advantage will likely remain underappreciated.

We believe this environment will create an important backdrop for active investing. Understanding companies with differentiated business models, unique cultures and durable competitive advantages will increasingly be crucial to determining investment performance in this complex environment.

Holdings are subject to change at any time. Please refer to the 'Important Disclosures' section at the end of this document for further information on investment risks and returns.

Important Disclosures

GENERAL INFORMATION

This is a marketing communication. Please carefully consider the investment objectives, risks, charges, and expenses of the Company. This and other important information is contained in the Company's Prospectus and KIIDs, which you may obtain by visiting sicav.williamblair.com. Read these documents carefully before investing.

Recipients of this document should be aware of the risks detailed in this paragraph. Please be advised that any return estimates or indications of past performance on this document are for information purposes only. Both past performance and yield may not be a reliable guide to future performance. The value of investments and income from them may fall as well as rise and investors may not get back the full amount invested. The value of shares and any income from them can increase or decrease. An investor may not get back the amount originally invested. Where investment is made in currencies other than the investor's base currency, the value of those investments, and any income from them, will be affected by movements in exchange rates. This effect could be unfavourable as well as favourable. Levels and bases for taxation may change.

Specific securities identified and described to do not represent all of the securities purchased or sold and you should not assume that investments in the securities identified and discussed were or will be profitable. Holdings are subject to change at any time. References to specific securities and their issuers are for illustrative purposes only and are not intended and should not be interpreted as investment advice, offer or a recommendation to buy or sell any particular security or product.

Any discussion of particular topics is not meant to be complete, accurate, comprehensive or up-to-date and may be subject to change. Factual information has been taken from sources we believe to be reliable, but its accuracy, completeness or interpretation cannot be guaranteed. Information and opinions expressed are those of the author and may not reflect the opinions of other investment teams within William Blair. Information is current as of the date appearing in this material only and subject to change without notice.

RISKS

The value of shares and any income from them can increase or decrease and an investor may not get back the amount originally invested. Where investments are made in currencies other than an investor's base currency, the value of those investments will be affected (favourably or unfavourably) by movements in exchange rates. Equity securities may decrease in value in response to the activities of an individual company or in response to general market, business, and economic conditions. International investments typically involve special risk considerations, including higher volatility, lower liquidity, economic and political risk.

Further specific risks may arise in relation to specific investments and you should review the risk factors very carefully before investing. Intended risk profile of the Fund may change overtime. The Fund is designed for long-term investors. The most current month-end performance information is available on sicav.williamblair.com.

FUND INFORMATION

The Fund is a sub-fund of William Blair SICAV, a “société d’investissement à capital variable”, incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 31, Z.A.I. Bourmicht, Bertrange, registered in the R.C.S. Luxembourg under n^o 98806 and approved by the Luxembourg Supervisory Authority of the Financial Sector (the “CSSF”) as an undertaking for collective investment in transferable securities (“UCITS”) in accordance with the EU directive 2009/65/EC, as amended (the “Company”). Authorization of the Company by the CSSF is not an endorsement or guarantee nor is the CSSF responsible for the contents of any marketing material or the Company’s Prospectus or applicable Key Investor Information Document (“KIID”). Authorization by the CSSF shall not constitute a warranty as to the performance of the Company, and the CSSF shall not be liable for the performance of the Company.

The investments in the Fund may not be suitable for all recipients. This material is for informational purposes only, is not contractually binding, and does not contain personalized recommendations or advice and is not intended to substitute any professional advice on investment in financial products. The Company may not be registered to be marketed in or may only be marketed to certain categories of investors in your jurisdiction. For information regarding jurisdictions in which the Company is registered or passported, please contact your William Blair representative. This document should not be used or distributed in any jurisdiction, other than those in which the Fund is authorized, where authorization for distribution is required.

This document has been prepared and issued by WILLIAM BLAIR INVESTMENT MANAGEMENT, LLC in its capacity as a delegate of the FUNDROCK MANAGEMENT COMPANY S.A., a “société anonyme”, incorporated under the laws of the Grand Duchy of Luxembourg having its registered office at 33, rue de Gasperich, L-5826 Hesperange and registered in the R.C.S. Luxembourg under n^o 104196 (the “Management Company”). The Management Company is authorised and regulated by CSSF as the management company of UCITS under the EU directive 2009/65/EC, as amended. The Management Company has been appointed as the management company of the Company and has appointed WILLIAM BLAIR INVESTMENT MANAGEMENT, LLC, the asset management business of WILLIAM BLAIR & COMPANY, LLC., having its registered office at 150 North Riverside Plaza Chicago, IL 60606, USA as the investment manager for the Fund.
